

To whom it may concern,
My choice of how i get my travel information is important to me and the fact that it is under attack is of obvious concern to me. If in some way it is a concern for broadcast radio that there product is threatened, then i think the obvious question is why arent they being forced to improve. squashing progress is not the answer and niether is squashing my rights for a choice. I ask that you reject the NAB's petition 04-160 and allow me and others the freedom of choice that others have daily with local news and weather or the choice of NATIONAL CABLES..... the weather channel. is there a difference, I don't see any.
